

Example of how I would like you to format the ANOVAs from SPSS that you are doing for homework

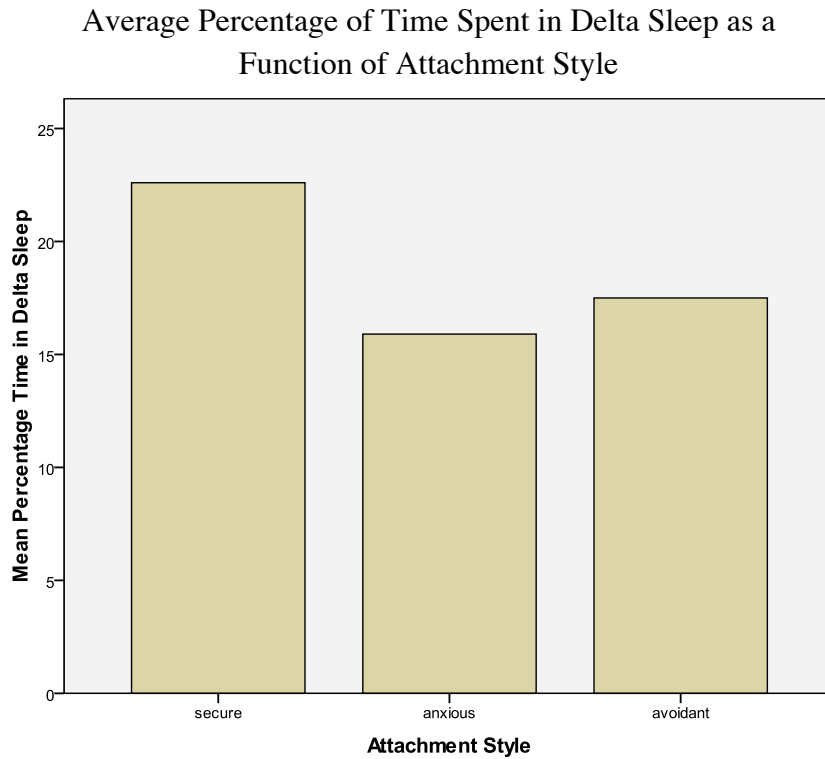

Figure 1

**ANOVA**

	Sum of Squares	df	Mean Square	F	Sig.
Between Groups	244.867	2	122.433	41.425	0.00000001
Within Groups	79.800	27	2.956		
Total	324.667	29			

Conclusion. Average percentage sleep time as a function of attachment style is displayed in Figure 1. The results of a one-way between groups ANOVA showed an overall significant effect of attachment style on average sleep time,  $F(2, 27) = 41.425$ ,  $MSE = 2.956$ ,  $p = .00000001$ .
